NIPPON IS HEARD FROM AT LAST; SMALLPOX BOAT COMES SATURDAY

At last the mystery concerning the Nippon Maru has been cleared up. A wireless received this morning by Castle & Cooke from the liner says she will arrive off port from Yokohama at noon Saturday. This is the first definite word about the liner's movements the local agency has had in 10 days.

Capt. Maki signed the radio, which said the liner had 1443 tons of cargo and 143 steerage passengers for Honolulu. Total passengers aboard are given in the message as 312. The steamer will dock Saturday afternoon and leave some time Sunday for San Francisco.

Smallpox cases breaking out among the Filipino and Asiatic steerage passengers are the reason for the liner's delay. The steamer left Yokohama January 16 and put back two days from the disease. She left Yokohama again. This news was contained in cables received by Castle & Cooke.

The next news was a cablegram received by the Hawaii Hotel January 29, saying the Nippon had put back to Yokohama January 24 a second time, owing to another outbreak of smallpox, several cases. The cable said she had been sent immediately to the Nagahama quarantine station, near Yokohama, for disinfection. Castle & Cooke's shipping department says the Nippon must have left Yokohama again some time January 24, in order to arrive here next Saturday, February 3. Disinfection was

WHY RHEUMATISM COMES WITH COLD WEATHER

(By Valentine Mott Pierce, M. D.)
A close connection exists between these two—cold weather and rheumatism. Prof. Alex. Hays of London has the most followers in the medical profession in the belief that the presence of uric acid in the system, or its salts in the blood, is the real cause of rheumatism. Every one has recognized the difference in the appearance of their water as soon as it gets cold; there is often a copious sediment of "brick dust."

Several causes may lead up to an accumulation of uric acid in the system, which, in turn, cause rheumatism or gout, or crampy joints, swollen fingers, or painful joints. For one reason the skin does not throw off the uric acid, by profuse sweating, as in the hot weather, and the kidneys are unable to take care of the double burden. Another reason is that people do not drink as much water in cold weather as in summer, which helps to flush the kidneys. Again, they eat more meat in cold weather, and some people are so susceptible that they soon develop rheumatism after eating meat.

At all such times persons should drink copiously of hot water, say, a pint morning and night, and take Auric (double strength) three or four times a day. This Auric comes in tablet form and can be had at almost any drug store. It dissolves the uric acid in the system and carries it outward. I would advise everyone to take Auric occasionally, and continue for three or four weeks, and in that way avoid rheumatism, gout, and many of the painful disorders due to uric acid in the system.

Makes yourself healthy and strong by opening exercise and diet. Then cleanse the liver by occasionally stimulating its action with a pleasant laxative composed of the May-apple, dried juice of aloe, and root of jalap, sugar-coated and long sold by all druggists as Dr. Pierce's Pleasant Pellets.

NOTICE.

Intending deck passengers per the steamship "Mauna Kea" sailing from Honolulu, February 3rd, are hereby notified that all main deck space has been sold.

SIERRA LEAVES; SONOMA IS LATE

At 11 o'clock last night the Oceanic liner Sierra left for San Francisco from Pier 6, going out to the minute on the time advertised for her departure.

The Sierra took from Honolulu 20 first cabin, seven second and three steerage passengers. Freight out was 1420 tons, including 14,845 cases of canned pines, 8641 bags of sugar, 3472 bunches of bananas, 320 bags of empty bottles, 504 bundles of hides and skins, 80 crates of fresh pines and other freight.

Sonoma is Day Late
One day late, the Sonoma left San Francisco today for Honolulu. She should have steamed Tuesday but as she reached San Francisco January 17, a day and a half late, and had to go on drydock to have her hull cleaned and painted, it was not possible for her to leave on schedule. She will probably not reach Honolulu until

until Tuesday morning, February 6, instead of Monday. The Sonoma is bringing a big list of tourists coming for the 1917 Carnival.

The Sonoma left San Francisco for Honolulu at 2:20 this afternoon, coast time.

At 3:30 Tuesday afternoon the U. S. army freight transport Dix steamed for Seattle, taking nine horses, officers' private mounts, to the Northwest port for transshipment by rail to the army posts where their owners have been ordered. She brought army coal here from Milke.

CUTLERY HOSPITAL

Shears, Razors and Safety Blades cured of that dull feeling. Fat Razors made thin by our grinding treatment. Safety blades treated to mow down hair and stumps. All operations performed by expert grinding surgeon. CARL MILLER, 1125 Fort, the only practical grinder in Honolulu.—Adv.
